Ideation Phase
Empathize & Discover

Date	2 October 2026
Team ID	SWTID-2026-5435
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

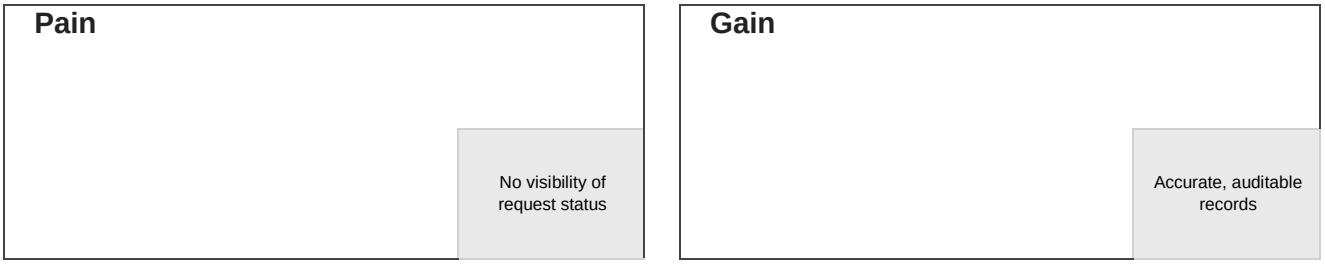

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Project Context:

Standard laptop requests in many organizations are still handled through manual emails, spreadsheets and repeated approval follow-ups. This empathy map captures the perspective of the IT procurement officer who processes these requests, to guide the design of an automated workflow built with Flow Designer.

Delays from manual approvals

Errors from repeated data entry

Automated request-to-order flow

Faster delivery to employees

Example: IT Procurement & Standard Laptop Ordering

Persona: IT Procurement Officer handling employee laptop requests
