Project Design Phase
Problem – Solution Fit Template

Date	02 October 2026
Team ID	SWTID-2026-5435
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- **Understand the existing situation in order to improve it for your target group.**

Problem – Solution Fit Canvas: Streamlining IT Procurement (Automating Standard Laptop Orders with Flow Designer)

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

- IT procurement officers and teams in mid-to-large organizations who process employee laptop requests
- Hiring managers and new employees who need a standard laptop before the joining date
- Finance / budget approvers who sign off laptop purchases

6. CUSTOMER CONSTRAINTS — CC

- Fixed budget and a company policy limited to standard laptop models
- Approvers are busy or away, so approvals stall
- Limited IT staff time for routine orders
- Existing tools (email, spreadsheets) are not connected
- Need for an audit trail of every approval and order

5. AVAILABLE SOLUTIONS — AS

- **Email and spreadsheets:** familiar and cheap, but slow, error-prone and hard to track
- **Manual IT tickets:** some tracking, but approvals and orders are still handled by hand
- **Direct vendor portal purchase:** quick, but bypasses approvals and leaves no central record

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

- Order standard laptops quickly and accurately, following company policy
- Get approvals without chasing people
- Avoid delays and errors when creating purchase orders
- See the status of every request
- Have the laptop ready before the employee joins

9. PROBLEM ROOT CAUSE — RC

- No automated workflow connects the request, approval and purchase order
- The same details are re-typed across emails and spreadsheets
- There is no central tracking or automatic notification
- Routine standard orders are handled like one-off custom requests
- The process grew around manual tools and was never redesigned

7. BEHAVIOUR — BE

- Procurement officers send emails and chase approvers by phone or chat
- They keep personal spreadsheets to track orders
- Employees repeatedly ask IT "where is my laptop?"
- People already use the IT service portal and email notifications for other requests, so a portal-based flow fits existing habits

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

- HR confirms a new hire with a joining date
- A laptop refresh or replacement is due
- Approvals pile up and a manager complains about a delay

4. EMOTIONS: BEFORE / AFTER — EM

- **Before:** overwhelmed, frustrated and anxious about missing the joining date
- **After:** in control, confident and relieved; new hires start work productively

10. YOUR SOLUTION — SL

- A standard laptop catalog item on the service portal captures the request in one form
- A Flow Designer flow routes it to the manager / budget approver, with reminders and escalation
- After approval, it checks stock and creates the purchase order for the vendor automatically
- Requesters and approvers get notifications at every stage, and the request closes after hand-over
- Dashboards show approval time, order volume and delivery time
- It fits existing behaviour: people already use the portal and email approvals

8.1 ONLINE — CH

- Service portal catalog request and request tracking page
- Approval through email or portal notification
- Vendor ordering through a REST API
- Reports and dashboards for procurement and finance

8.2 OFFLINE — CH

- Quick conversations with the manager or IT service desk
- Phone or chat follow-ups with approvers
- In-person laptop hand-over and setup by IT
- HR onboarding meetings where equipment needs are raised
