User Acceptance Testing (UAT) – Standard Laptop Procurement Automation

Date	02 October 2026
Team ID	SWTID-2026-5435
Project Name	Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Project Overview:

Project Name: Streamlining IT Procurement – Automating Standard Laptop Orders with Flow Designer
Project Description: A ServiceNow Flow Designer automation that creates a Catalog Task for an approved Standard Laptop Requested Item and assigns the task to the Hardware assignment group for configuration.
Project Version: 1.0

Testing Period: 02 October 2026

Testing Scope:

- Standard Laptop Catalog Item request and submission
- Standard Laptop Task Flow Designer flow
- Service Catalog trigger and flow association
- Approval processing
- Automatic Catalog Task creation
- Catalog Task description and Hardware assignment group

- An approved Standard Laptop request should trigger the configured flow.
- The flow should create a Catalog Task for the Standard Laptop Requested Item.
- The Catalog Task should contain the configured task description.
- The Catalog Task should be assigned to the Hardware assignment group.

Testing Environment:

URL/Location: ServiceNow instance used for the project implementation and testing.

Credentials (if required): Accessed through an authorized ServiceNow account. Credentials are intentionally not recorded in project documentation.

Test Cases:

Test Case ID	***Test Scenario***	***Test Steps***	***Expected Result***	***Actual Result***	***Pass/Fail***
TC-001	Verify Standard Laptop Task flow configuration	1. Open Flow Designer. 2. Open the Standard Laptop Task flow. 3. Verify the Service Catalog trigger and Create Catalog Task action.	The Standard Laptop Task flow is available and contains the configured Service Catalog trigger and Catalog Task creation action.	Flow configuration was verified during project im pl em en t ati o n.	PASS
TC-002	Verify flow is associated	1. Open the Standard Laptop Catalog Item.	The Standard Laptop	The flow association	PASS

	with the Standard Laptop Catalog Item	2. Open Process Engine/configuration. 3. Verify that Standard Laptop Task is associated with the item.	Catalog Item is associated with the Standard Laptop Task flow.	was verified as part of the im pl em en t ati o n procedure.	
TC-003	Place a Standard Laptop request	1. Open Service Catalog. 2. Navigate to the Standard Laptop item. 3. Select Order Now and submit the request.	A Standard Laptop Requested Item is created and is available for approval processing.	The Standard Laptop request was successfully placed during the project procedure.	PASS
TC-004	Complete the approval process	1. Open the Standard Laptop request. 2. Open the approval details. 3. Approve the request. 4. Open the resulting Requested Item.	The request reaches the approved state and the Requested Item can be inspected for the automation result.	The approval step was completed successfully during the project procedure.	PASS
TC-005	Verify automatic Catalog Task creation	1. Open the approved Standard Laptop Requested Item. 2. Locate the Catalog Tasks section. 3. Open the created Catalog Task.	A Catalog Task is automatically created for the Standard Laptop Requested Item after approval.	The Catalog Task was automatically created and verified under the Requested Item.	PASS
TC-006	Verify Catalog Task description	1. Open the automatically created Catalog Task. 2. Review the short description and description fields.	The configured task description is displayed as 'Laptop needs to Configured'.	The configured description was verified on the created Catalog Task.	PASS
TC-007	Verify Catalog Task assignment to Hardware	1. Open the automatically created Catalog Task. 2. Review the Assignment Group field.	The Catalog Task is assigned to the Hardware assignment group.	The Catalog Task was verified as assigned to the Hardware group.	PASS
TC-008	Negative scenario – request before approval	1. Create a Standard Laptop request. 2. Leave the request unapproved. 3. Check whether the post-approval Catalog Task has been generated.	The approval-dependent automation should not be treated as completed before the required approval condition is satisfied.	Not executed as part of the recorded im pl em en t ati o n procedure; requires separate execution if negative-case evidence is required.	NOT TESTED

Bug Tracking:

Bug ID	***Bug Description***	***Steps to reproduce***	***Severity***	***Status***	***Additional feedback***
BG-001	No defect recorded during the documented positive execution path.	Not applicable.	N/A	Closed / No defect observed	The recorded implementation successfully reached automatic Catalog Task creation and Hardware assignment.

					Negative-case testing is listed separately as not tested.

Sign-off:

Date: 02 October 2026

Notes:

- Positive execution scenarios are documented above. A negative approval-dependent scenario is included and explicitly marked NOT TESTED where execution evidence is not available.
- Tester feedback can be added after final review of the ServiceNow instance.
- No defect was recorded in the documented positive execution path.
- Complete the tester/project manager/product owner sign-off according to the team's SkillWallet process.
